

## SPRING SOIL

The good maintenance of the environment in which we live plays an important role in our life quality.

Well-tended green areas are, therefore, an aim that must be achieved in urban areas to create a quality environment.

The **SPRING SOIL** is a fertilized gardening soil designed for large gardens.

### properties

**SPRING SOIL** is a vegetal soil made out of vegetal compost (Enervit) and natural earth, suitable for commons species farming. The function of each component of the mix is detailed on the table below.

This mixture combines both inert and organic materials, which guarantee the fixing and growth of the transplanted species..

COMPONENT	FUNCTION
ENERVIT	Organic matter amendment: provides organic matter and nutrients
NATURAL SOIL	Improves water and nutrients retention capacity

Detailed properties of this soil can be found on the table below.

PROPERTY	UNIT	VALUE
ORGANIC MATTER	% s.m.s.	6-12
pH		7.5-8.5
ELECTRICAL CONDUCTIVITY	mS/m	70-120
HUMIDITY	% m/m	14-18
GRANULOMETRY	mm	<16

The whole producing processes, as well as the final product, is under our accurate quality controls certified by "Normas" ISO-9001 and 14001, with the aim of guaranteeing the satisfaction of our clients as well as a deep respect towards the environment as in all our activities.

### aplications

**SPRING SOIL** is ideal for large gardens use, such as the following:

- Large growing extensions in urban or near-urban areas.
- Roundabouts and road or highways entrances
