

## KELAMIX Fe

**KELAMIX Fe** es un quelato de hierro (Fe EDDHA) microgranulado y totalmente soluble en agua. Contiene un 6% de hierro estabilizado por el isómetro orto-orto de la molécula EDDHA, que es el de mayor eficacia en los suelos de pH básico. Corrector de clorosis férrica por carencia o inducción

### CHARACTERISTICS

**KELAMIX Fe** is of extreme purity and high solubility, which allows to obtain high quality productions and an unbeatable performance. Its high solubility ensures penetration into the soil to the root zone quickly and effectively, guaranteeing the uniformity of treatments. The first symptoms of the correction of chlorosis are observed after a few days after its application, since it is easily absorbed and

transported by the plant.

### WEALTH GUARANTEED

Iron (Fe) soluble in water and chelated as EDDHA ... 6%

Chelating agent: EDDHA

Iron (Fe) chelated (ortho-ortho \* isometer): 3.5%

Stable at pH: 3.5-9.5

\* EN-13368-2 method

CROP	DOSE AND INSTRUCTIONS OF USE
	Dissolved in water: in localized irrigation or micro-aspersion, with the injection lance (max. 1-2 injections per m <sup>2</sup> at 20-30 cm depth, or 4-10 injections per tree), or any other system that allows locate the product close to the root zone. <b>KELAMIX Fe</b> can be used whenever it is desired to correct an iron chlorosis, being advisable if application before sprouting, as preventive or when deficiency appears, as curative. In horticultural and ornamental crops, it will be applied at the beginning of the crop or at critical moments (flowering, setting, maturation, etc.) of the vegetation. In all cases it is advisable to treat on humid soils, to facilitate rapid absorption by the roots, as well as irrigation after application.
FRUIT TREES	Young trees ..... 5 to 20 g/ft Adult trees ..... 50 to 100 g/ft Nurseries ..... 3 to 5 g/m <sup>2</sup>
VINE	Young strains ..... 3 to 5 g/ft Adult strains ..... 5 to 10 g/ft Parral ..... 10 at 20 g/ft
VEGETABLES AND ORNAMENTALS	Horticultural/ornamental..... 1 a 5 g/m <sup>2</sup> Fertigation..... 35 a 70 g/m <sup>3</sup>
The recommended doses are for guidance purposes, the result of different field experiences and trials. The composition of the product in its original container is guaranteed	

### TERMS OF SERVICE

The **KELAMIX Fe** product is supplied in 5 kg drums and 50 g sachets.
